

The iPhone 16 128 GB is a 5G mobile phone featuring Camera Control, an A18 chip, and a significant boost in battery life. It works seamlessly with AirPods and is available in black. Manufactured by Apple, it runs on iOS 17 and has a RAM memory installed size of 128 GB, with the same amount of memory storage capacity. The device boasts a 6.1-inch Super Retina XDR all-screen OLED display with a resolution of 2556x1179 pixels at 460 ppi.

Apple Intelligence enhances user interaction by providing assistance in writing, self-expression, and productivity, all while ensuring privacy protection so that data remains inaccessible to anyone, even Apple. The Camera Control feature enables easier access to camera tools such as zoom and depth of field, allowing users to capture the perfect shot effortlessly. The Ultra Wide camera with autofocus supports macro photography, while the 48MP Fusion camera delivers high-resolution images, complemented by the 2x optical-quality Telephoto zoom.

The Photographic Styles feature lets users creatively enhance their photos and revert styles whenever desired. The A18 chip surpasses previous models, enabling Apple Intelligence, advanced photo and video features, and console-level gaming with exceptional power efficiency. The phone is rated IP68 for splash, water, and dust resistance, capable of withstanding depths of up to six meters for 30 minutes. It features an advanced dual-camera system, including a 48MP Fusion camera with optical image stabilization, a 12MP 2x Telephoto camera, and a 12MP Ultra Wide camera with a 120-degree field of view. Other imaging features include Deep Fusion, Smart HDR 5, Night mode, and spatial photos.

In terms of battery life, video playback lasts up to 22 hours, streamed video playback reaches 18 hours, and audio playback extends up to 80 hours. The built-in lithium-ion battery supports MagSafe wireless charging up to 25W with a 30W adapter or higher, Qi2 wireless charging up to 15W, and fast charging, achieving 50% charge in around 30 minutes with a 20W adapter or higher.

Included in the box is the iPhone running iOS 18, a USB-C charge cable (1 m), and documentation. Apple provides a one-year limited warranty on the hardware and accessories, as detailed on their website. The phone dimensions are 147.6 mm in height, 71.7 mm in width, and 7.80 mm in depth, with a weight of 170 grams.

Lightweight and high quality

Very light and better than previous versions. Or let's say everything is great but I'm little disappointed by the camera, I believe the best camera they had was with 11, after all my upgrades and finally to 16, I didn't find such stable and best-in-class camera. AI in iOS is still evolving and not yet that great.

Recent iPhone 16 review...!! Good buy

Absolutely ☺ Phone.!! Switching from iPhone 11 to iPhone 16 was an amazing experience for me. Apple has nailed it. After 5 years, this was my new phone. The weight balance of the phone is amazing, lighter than iPhone 11. Exchange value for 16000/- INR, and after discounts, got iPhone 16 for 50k INR. Found a good deal before for 47k by varying the locations on other platforms. With iCloud, I got back my iPhone 11 settings and configurations hassle-free. Don't read too many reviews which may lead to ending up with a different product. Trust your usage and requirements and choose reliable phones. Avoid nonsense YouTube exaggerated reviews. Everyone has a different usage pattern.

This cost me my ten months' petrol price, a good phone for those who want to shift to iOS from Android for the first time.

Too pricey

It's a good phone overall but it is hyped; not much of an improvement from previous ones. The price is too much. We are paying mostly for the brand. Apple should not charge this much for a phone. Excellent Amazon delivery and services. The price could be easily 20k less to around 60k plus. Apple is ripping us off, and that's why 1 star.
